Teaching Learning Process

Teaching methods that prioritize the student and their learning process are a positive step toward a more effective education system. These methods are aligned with the constructivist theory of learning and have been around for a while, but have been given specific titles by their creators, such as

- Activity Based Learning,
- Guided Discovery,
- Inquiry Approach,
- Problem-Based Learning,
- Project-Based Learning,
- Situated Learning.

While these methods may have subtle differences, they share common underlying principles and practices. These principles include the importance of active student involvement and intrinsic motivation, the need for interesting and relevant subject matter, and the value of real-life learning experiences.

Student-centric approaches and the contexts in which they can be used can be addressed under inquiry-based methods, project-based or resource-based learning, and computer-assisted learning. By adopting these methods, educators can create a more engaging and effective learning environment for their students.

Activities to Support Teaching-Learning Process:

Kopergaon Taluka Education Society's K. J. Somaiya College of Arts, Commerce & Science, Kopergaon, believes in the power of interactive and engaging learning experiences to support a robust teaching-learning process. That's why we have implemented various activities that utilize different learning resources and ICT-enabled facilities to achieve the desired outcomes of outcome-based education. Our students and faculty members actively participate in these participative and interactive activities to ensure that they are well-equipped with the necessary skills and knowledge to succeed in today's competitive world. Join us and experience the benefits of an effective and engaging learning environment.

Kopargaon Taluka Education Society's K. J. Somaiya College of Arts, Commerce & Science, Kopargaon is committed to providing a comprehensive and well-rounded education to its students.
