Bridge Course in Physics: Basic Concepts in Energy studies
[2022-2023]

MESSAGE FROM COORDINATOR

The objective of the Bridge course is to clarify what is expected of students in University-level classes and to provide adequate foundation in the core applied science subjects limited to moderate level so that students do not face any difficulty when the classes commence. During this interaction of few days with the faculty, the students will come out of their hesitation and it will be the best platform for the students to interact with the faculty members, making it responsible for them to build strong relationships with faculty and other students. This course was conducted from last three years for our students. The statistics show that, there is a gradual improvement of more than 20-30% in the overall performance of the students. Their parents have also deeply appreciated.

Objectives:

- To provide adequate foundation in the basic applied science subject, so that students do not face any difficulty when the university classes begin.
- This course provides a better transition phase to prepare themselves before the onset of course for first semester.
- To bridge the gap between subjects studied at pre-university level and subjects they would be studying in B.Sc. classes.
- Bridge course act as a buffer for new entrance.
- Interactive & active learning students will be equipped with knowledge and the confidence before first year course. It is a course conduct by each and Department by framing their own syllabus from the session 2022-23 in the first week of month July.
- It is an independent Programme for newly admitted B.Sc. students. The reason is to
 construct such bridge courses as per our observation that students have virtually stopped
 studying after completion of their exams, competitive exams & it's a long gap in studies.
 To full fill this gap, our college conducts such bridge course for newly admitted students
 before the commencement of B.Sc.
- On the last day of bridge course each lecturer made aware the students about their subject programme outcomes at university pattern to prepare them for new challenges.

Duration: 6 Days in first week of SEM-I

Day: Monday to Saturday

Syllabus:

1. Introduction [2L]

The Sun, Earth and Renewable Energy, Photovoltaic Effect, Solar Cell, Types of Solar Cell.

2. Basic Solar PV Systems [4L]

Basic types of PV systems on grid and off grid, DC to AC conversion, System Components, Batteries, Charge Controllers, Inverters, Application of off grid PV system.

MESSAGE FROM COORDINATOR

The objective of the Bridge course is to clarify what is expected of students in University-level classes and to provide adequate foundation in the core applied science subjects limited to moderate level so that students do not face any difficulty when the classes commence. During this interaction of few days with the faculty, the students will come out of their hesitation and it will be the best platform for the students to interact with the faculty members, making it responsible for them to build strong relationships with faculty and other students. This course was conducted from last three years for our students. The statistics show that, there is a gradual improvement of more than 20-30% in the overall performance of the students. Their parents have also deeply appreciated.

Objectives:

- To provide adequate foundation in the basic applied science subject, so that students do not face any difficulty when the university classes begin.
- This course provides a better transition phase to prepare themselves before the onset of course for first semester.
- To bridge the gap between subjects studied at pre-university level and subjects they would be studying in B.Sc. classes.
- Bridge course act as a buffer for new entrance.
- Interactive & active learning students will be equipped with knowledge and the confidence before first year course. It is a course conduct by each and Department by framing their own syllabus from the session 2018-19 in the first week of month July.
- It is an independent Programme for newly admitted B.Sc. students. The reason is to
 construct such bridge courses as per our observation that students have virtually stopped
 studying after completion of their exams, competitive exams & it's a long gap in studies.
 To full fill this gap, our college conducts such bridge course for newly admitted students
 before the commencement of B.Sc.
- On the last day of bridge course each lecturer made aware the students about their subject programme outcomes at university pattern to prepare them for new challenges.

Duration: 6 days in a week.

Day: Monday to Saturday.

Syllabus:

1. Introduction [2L]

The Sun, Earth and Renewable Energy, Photovoltaic Effect, Solar Cell, Types of Solar Cell.

2. Basic Solar PV Systems [4L]

Basic types of PV systems on grid and off grid, DC to AC conversion, System Components, Batteries, Charge Controllers, Inverters, Application of off grid PV system.

Report of Industrial Visit to Sanjivani Sahakari Sakhar Karkhana

(AY-2018-19: Department of Chemistry)

- K. J. Somaiya College of Arts, Commerce & Science, Kopargaon conducts different activities for the educational growth of students. The Department of Chemistry of the college organized an industrial visit to Sanjivani Sahakari Sakhar Karkhana, Kopargaon on 07/02/2019. This visit was successfully completed by fifty-nine students. In this visit the students were visited the different units of the Sugar and Fermentation industry. In the beginning, instructions related to personal safety in the plant and overview of different units of the plants to be given by the supervisor of the industry to the students. After the introductory lecture the students were divided into different groups with one instructor of the plant. The students visited the Extraction of Juice form cane sugar, Purification of Juice of the plant and knew the actual working method in this plant, like how to start a reaction and how to monitor it.
- In this programme the students get the actual knowledge of production of sugar and liquors form sugar and fermentation industry. Different chemicals production, their purification, storage and transport methods were also studied through this visit. The visit was definitely very crucial for the students from their practical knowledge.

Bridge Course for T.Y.B.Sc. Chemistry Students

Academic Year 2022-2023

Preamble:-

This course's primary goal is to close the knowledge gap between the hydrocarbons and reactions that students studied in S.Y.B.Sc. (Sem-III) and the aromatic hydrocarbons that would study in T.Y.B.Sc class (Sem-V) understanding the preparation of molecules, types of bonds, structural effects and hybridization of aliphatic and aromatic hydrocarbon is essential. Understanding many terminologies used in the class is crucial. Organic Chemistry is not included in S.Y.B.Sc. (Sem-IV) curriculum and due to covid 19 Pandemic, many students would not have understood the subject because of issues with online classes and learning. As a result, bridge course is created in such a way that it can be included in the S.Y.B.Sc. and T. Y.B.Sc. Organic Chemistry curriculam. The Bridge course objective include giving students enough time to adjust to the challenging core of the degree course, it serves as buffer for the students.

Objectives :-

- > To give students a solid foundation in the fundamentals of Organic Chemistry so they will not encounter any problems once TYBSc Chemistry lessons start.
- > To bridge the gap between aliphatic hydrocarbon reactions studied at (Sem-III) and aromatic hydrocarbon they would be studying in Sem- V.
- > This course offers abetter transition period for students to get ready before the styart of III sem courses and serves as buffer for the buffer for who nare preparing for test like JAM.
- > It is an independent programme of Dept of Chemistry for admitted TYBSC Chemistry students The reason is to construct such bridge courses as per our observation that students have virtually stop studying after pandemic its along gap in studies.
- > To fullfill this gap our department conducts such a bridge course for newly admitted students before the commencement of T.Y.B.Sc. classes.

On the last day of bridge course each lecturer make aware the students about the subject programme outcomes to prepare them for new challenges.

Duration: 6 Days in first week of Sem-V,

Time:- Wednesday To Wednesday

Syllabus:-

1. Reactions

Types of reactions, Rearrangement reactions, elimination reactions, Addition reaction, Substitution reaction.

2. Hydrocarbons:-

Functional group, definition, classification, isomers and isomerism, aliphatic hydrocarbons, alkene, alkane and alkyne, nomenclature, classification, reaction.

3. Structural effect in organic compounds:-

Introduction, bond length, bond angle, dipole moment, hybridization, resonance effect, inductive effect, steric effect, hyperconjugation, tautomerism.

Bridge Course for M.Sc.Chemistry Students # Academic Year 2022-2023

Preamble:-

This course's primary goal is to close the knowledge gap between the hydrocarbons and reactions that students studied in S.Y.B.Sc(Sem-III)And the aromatic hydrocarbons that would study in T.Y.B.Sc class (Sem- V) understanding the preparation of molecules, types of bonds, structural effects and hybridization of aliphatic and aromatic hydrocarbon is essential. Understanding many terminologies used in the class is crucial. Organic Chemistry is not included in S.Y.B.Sc(Sem- IV) curriculum and due to covid 19 Pandemic, many students would not have understood the subject because of issues with online classes and learning. As a result, bridge course is created in such a way thatit can be included in the SYBSC and TYBSC Organic chemistry curriculam. The Bridge course objective include giving students enough time to adjust to the challenging core of the degree course, it serves as buffer for the students.

Kopargaor

Objectives :-

- > To give students asolid foundation in the fundamentals of Organic Chemistryso they will not encounter any problems once TYBSc chemistry lessons start.
- > To bridge the gap between aliphatic hydrocarbon reactions studied at (Sem-III)and aromatic hydrocarbon they would be studying in Sem- V.
- > This course offers abetter transition period for students to get ready before the styart of IIISem- courses and serves as buffer for the buffer for who nare preparing for test like JAM.
- > It is an independent programme of Dept. of chemistry for admitted TYBSC chemistry students The reason is to construct such bridge courses as per our observation that students have virtually stop studying after pandemic its along gap in studies.
- > To fullfill this gap our department conducts such a bridge course for newly admitted students before the commencement of T.Y.B.Sc. classes.

On the last day of bridge course each lecturer make aware the students about the subject programme outcomes to prepare them for new challenges .

Bridge Course for M.Sc.Chemistry Students # Academic Year 2021-2022

Preamble:-

This course's primary goal is to close the knowledge gap between the Reaction mechanism and reactions that students studied in T.Y.B.Sc(Sem--V) and Stereochemistry that would study in M.Sc. class (Sem--I) understanding the preparation of molecules, conformation, configuration and Types of reaction is essential. Understanding many terminologies used in the class is crucial. Organic Chemistry is not included in T.Y.B.Sc. (Sem-V) curriculum and due to covid 19 Pandemic, many students would not have understood the subject because of issues with online classes and learning. As a result, bridge course is created in such a way that it can be included in the T.Y.B.Sc. and M.SC. Organic Chemistry curriculam. The Bridge course objective include giving students enough time to adjust to the challenging core of the degree course, it serves as buffer for the students.

Objectives :-

- > To give students a solid foundation in the fundamentals of Organic Chemistry so they will not encounter any problems once M.Sc.Chemistry lessons start.
- > To bridge the gap between reactions studied at (Sem-V)and Reaction Mechanism they would be studying in Sem-I of M.Sc. .
- > This course offers a better transition period for students to get ready before the start of IIISem courses and serves as buffer for the buffer for who nare preparing for test like NET,SET,GATE,ETC.
- ➤ It is an independent programme of Dept of Chemistry for admitted M.Sc. Chemistry students The reason is to construct such bridge courses as per our observation that students have virtually stop studying after pandemic its along gap in studies
- > To fullfill this gap our department conducts such a bridge course for newly admitted students before the commencement of M.Sc. classes.

On the last day of bridge course each lecturer make aware the students about the subject programme outcomes to prepare them for new challenges .

Duration:- 6 Days in first week of Sem-l.

Time:-Monday to Saturday.

Syllabus:-

1. Reaction mechanism:

Types of reactions, types of intermediates, carbocation, carbanion, carbene, nitrene, benzyne Rearrangement reactions, elimination reactions, Addition reaction, Substitution reaction.

2. Stereochemistry:-

Conformation, configuration, Stereoisomer, geometrical isomerism, stability for cyclohexane ring, interactions, Butane-Gauch interaction, 1,3 interaction, Eclipsed, staggered conformation, energy profile diagram for cyclohexane.

3. Spectroscopy:-

Introduction, Wavelength, Energy, Frequency, UV, Blue shift, Red shift IR, H¹NMR, Types of radiations, Anisotropic effect, Problems Related to UV, IR, H¹NMR.

NOTICE

Bridge Course for T.Y.B.Sc. Chemistry Students

Academic Year 2020-2021

Preamble:-

This course's primary goal is to close the knowledge gap between the hydrocarbons, and reactions that students studied in S.Y.B.Sc(Sem-III)And the aromatic hydrocarbons that would study in T.Y.B.Sc class (Sem- V) understanding the preparation of molecules, types of bonds, structural effects and hybridization of aliphatic and aromatic hydrocarbon is essential. Understanding many terminologies used in the class is crucial. Organic Chemistry is not included in S.Y.B.Sc(Sem- IV) curriculum and due to covid 19 Pandemic, many students would not have understood the subject because of issues with online classes and learning. As a result, bridge course is created in such a way thatit can be included in the SYBSC and TYBSC Organic chemistry curriculam. The Bridge course objective include giving students enough time to adjust to the challenging core of the degree course, it serves as buffer for the students.

Objectives :-

- > To give students asolid foundation in the fundamentals of Organic Chemistryso they will not encounter any problems once TYBSc chemistry lessons start.
- > To bridge the gap between aliphatic hydrocarbon reactions studied at (Sem-III) and aromatic hydrocarbon they would be studying in Sem- V.
- > This course offers abetter transition period for students to get ready before the styart of IIISem- courses and serves as buffer for the buffer for who nare preparing for test like JAM.
- > It is an independent programme of Dept. of chemistry for admitted TYBSC chemistry students The reason is to construct such bridge courses as per our observation that students have virtually stop studying after pandemic its along gap in studies.
- > To fullfill this gap our department conducts such a bridge course for newly admitted students before the commencement of T.Y.B.Sc. classes.

On the last day of bridge course each lecturer make aware the students about the subject programme outcomes to prepare them for new challenges.

Duration: - 6 Days in first week of Sem- V,

Time:- Tuesday To Monday

Syllabus:-

1. Reactions

Types of reactions Rearrangement reactions, elimination reactions, Addition reaction, Substitution reaction.

2. Hydrocarbons:-

Functional group, definition, classification, isomers and isomerism, aliphatic hydrocarbons, alkene, alkane and alkyne, nomenclature, classification, reaction.

3. Structural effect in organic compounds;-

Introduction, bond length, bond angle, dipole moment, hybridization, resonance effect, inductive effect, steric effect, hyperconjugation, tautomerism.

NOTICE
